

4 .- Value 86 for the final expression $\text{Offset} + (\text{N} - \text{Key}) \bmod 26$ (Line 14) is not correct.

2 .- Given the context:
Char = 109,
the following variable is assigned:
Offset = 97

3 .- Given the context:
Char = 109
Offset = 97,
the following variable is assigned:
N = 12

0 .- In the function:
rot(Char, Key)
when (Char \geq \$A) and (Char \leq \$Z) or
(Char \geq \$a) and (Char \leq \$z) ->
Offset = \$A + Char band 32,
N = Char - Offset,
Offset + (N - Key) rem 26.
pattern of first clause succeed.
Is this correct

1 .- In the function:
rot(Char, Key)
when (Char \geq \$A) and (Char \leq \$Z) or
(Char \geq \$a) and (Char \leq \$z) ->
Offset = \$A + Char band 32,
N = Char - Offset,
Offset + (N - Key) rem 26.
guard of first clause succeed.
